

The Elektron is a fall arrest and work positioning harness specifically designed to deliver a high level of comfort and exceptional freedom of movement.

The completely padded structure wraps the worker for a comfortable, secure fit and the waist belt features tilting attachment rings for the best side movements.

Fast buckles on the waist and legs for quick and easy on/off.

The leg loops feature unique construction with two additional work positioning attachment points that allow the worker to stand in a more comfortable semi-sitting position.

Two side aluminum alloy attachment points are adjustable in height.

Equipped with two fall arrest points: double textile loop in the front, aluminum alloy ring in the back.

Certified break-away parking loops for lanyards on the shoulders.

Gear can be easily carried and organized on the many textile and metal gear loops, as well as by installing Kilo gear carabiners.

Equipped with special loops for connecting Helpstep (ref.2062, sold separately) foot loops to help prevent suspension trauma in the event of a fall.

Equipped with NFC TRACK tag for digital identification.

2 sizes.

Tilting positioning attachment rings for the best side movements

Positioning attachment points are adjustable in height

The leg loops feature unique construction

Helpstep (ref.2062, sold separately): foot loops to help prevent suspension trauma in the event of a fall

C.A.M.P. presents in this catalog a **complete solution for the digital management of PPE**, both for allocation to users and for periodic inspections: the **NFC TRACK hardware tags on the products** work seamlessly with the **G.T.S. - Gear Tracking System software** to make the system very intuitive and easy to use.

**NFC TRACK chips are installed on many C.A.M.P. products** (harnesses, helmets, Retexo lanyards). They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

**NFC (Near Field Communication) technology** is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.

The **HF RFID (High Frequency Radio Frequency Identification)** communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

## - G.T.S. - GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app (campgts.it).

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S. includes the technical information of all C.A.M.P. products** for work at height and a **large number of other products** posted by other users of the community with publicly available information.

**NFC TRACK chip installed!**
