

Product ID:
RGH1

Product Name:
Rear D Safety Harness

RGH1

This one point safety harness comes with a single rear attachment point.

This safety harness is to be used primarily with a fall arrest safety lanyard to provide basic fall protection.

If combined with a twin leg lanyard (RGL3) the safety harness can be used for tower climbing, scaffold work and general steel erecting.

Suitable for use with fall arrest blocks, however we recommend the addition of the RGL4 extension stop to facilitate easy connection.

Accredited to:

EN 361:2002

Web material:

45mm water repellent polyester

Fittings:

High tensile steel alloy

Weight:

1.0kg
